

2022 Carrot Variety Trial Data Collection Sheet

Field evaluation:

Rate attributes at 3 early-season dates (14, 30, and 50 days after seeding) and at harvest.

Early-season evaluations are great times to scout for pest, disease, and climatic pressures. For each trait, **survey all of the varieties** to get a feel for the range of characteristics they show. **Rate varieties on a scale of 1-5 using the rubric in your protocol**, rather than ranking them best to worst. **Trust your judgment** and your knowledge of the crop! **If a trait doesn't apply to your planting**, please just leave it blank. **We encourage you to add pictures and free-form notes about these varieties!**

Using SeedLinked:

This worksheet is intended for use with the SeedLinked online platform (www.seedlinked.com).

After recording observations on this sheet, please **log into your SeedLinked account** to enter your ratings (1-5 stars) online.

Name:		Crop: Orange Carrots				Page: 1
Variety	Would you grow this variety again?	Germination	Vigour	Canopy Cover	Yield	
		1=Less than 50% 5=All or almost all	1 = Weak & slow growing 5 = Exceptional growth	1 = Little to no cover 5 = Close to 100% cover	1=Poor 5=Exceptional	
	Yes Maybe No	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
	Yes Maybe No	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
	Yes Maybe No	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
	Yes Maybe No	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	
	Yes Maybe No	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5
